# Codeforces Online Judge Guide

# Lecture Agenda

We will discuss in this lecture the following topics

1- Codeforces Online Judge

2- How to Create an Account

3- How to Solve a Problem

4- How to Learn from Other Solutions

5- How to Compete in Contest

6- How to Learn from Contest Tutorial

Let's
START UP

# Lecture Agenda

Section 1: Codeforces Online Judge

Section 2: How to Create an Account

Section 3: How to Solve a Problem

Section 4: How to Learn from Other Solutions

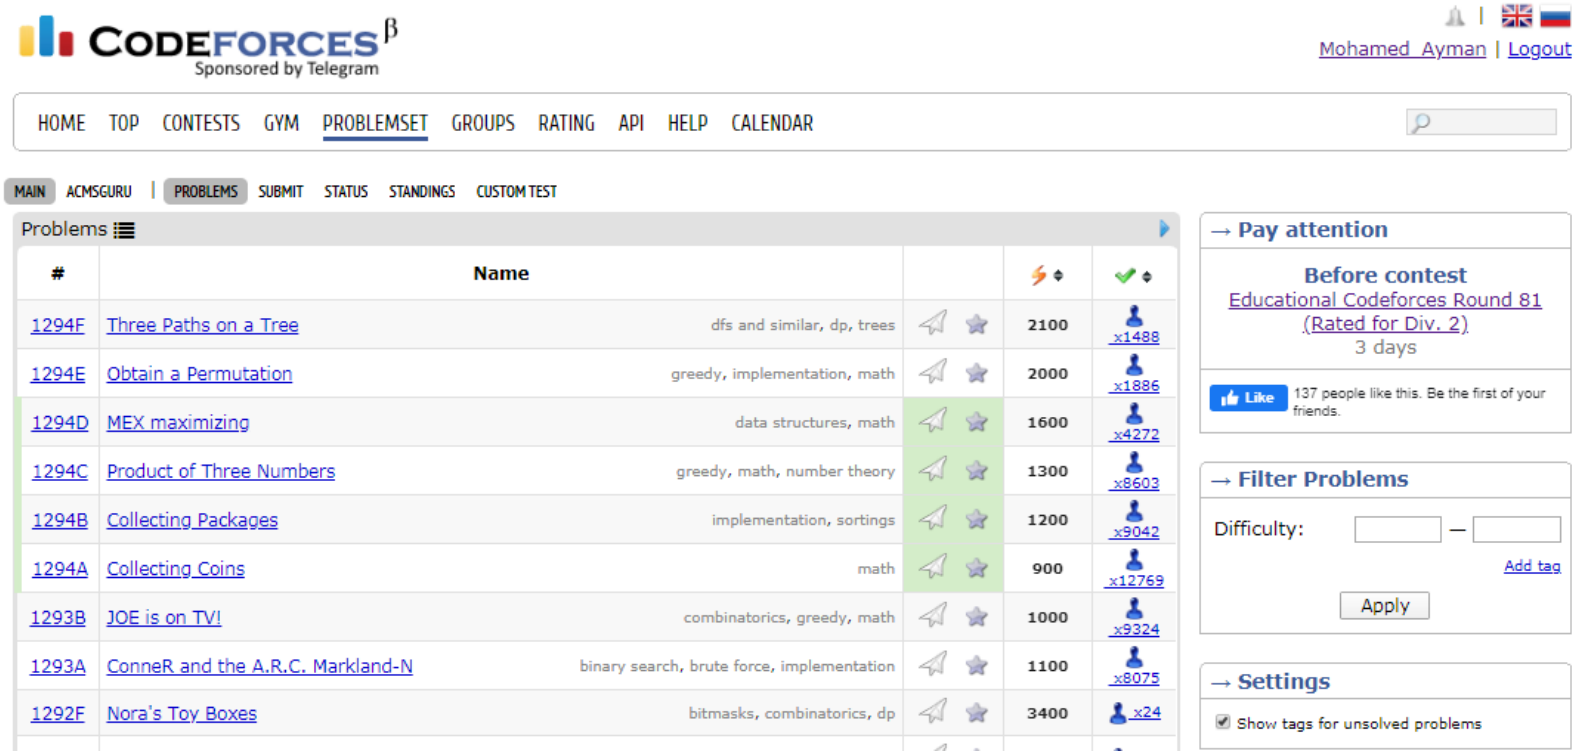
Section 5: How to Compete in Contest

Section 6: How to Learn from Contest Tutorial

# Codeforces Online Judge

Codeforces is a website that hosts competitive programming contests. It is maintained by a group of competitive programmers from ITMO University led by Mikhail Mirzayanov.

# Codeforces Online Judge



# Lecture Agenda

- ✓ Section 1: Codeforces Online Judge
- **Section 2: How to Create an Account**
- Section 3: How to Solve a Problem
- Section 4: How to Learn from Other Solutions
- Section 5: How to Compete in Contest
- Section 6: How to Learn from Contest Tutorial

# How to Create an Account

1- Go To Registration

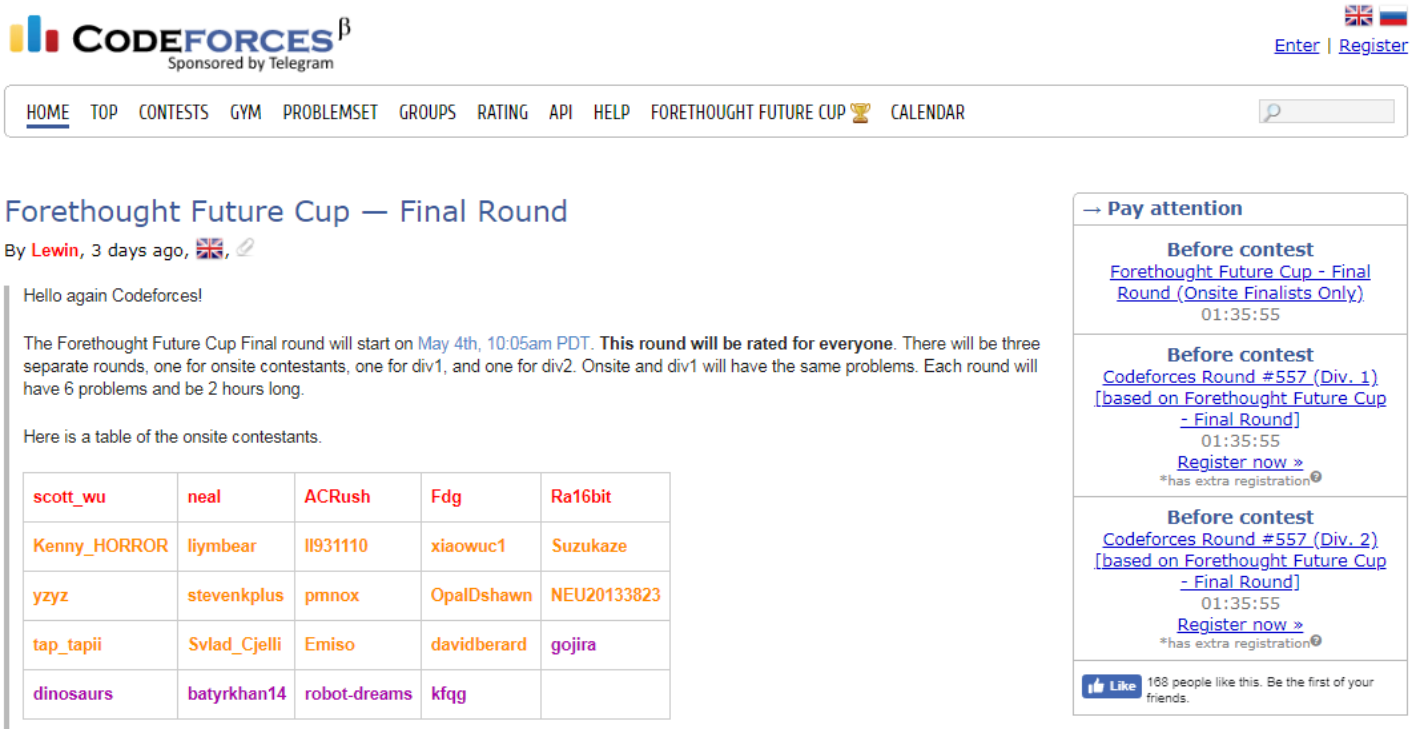
2- Fill Your Data

3- Verify your Registration from your Mail

4- Log-in Your Account

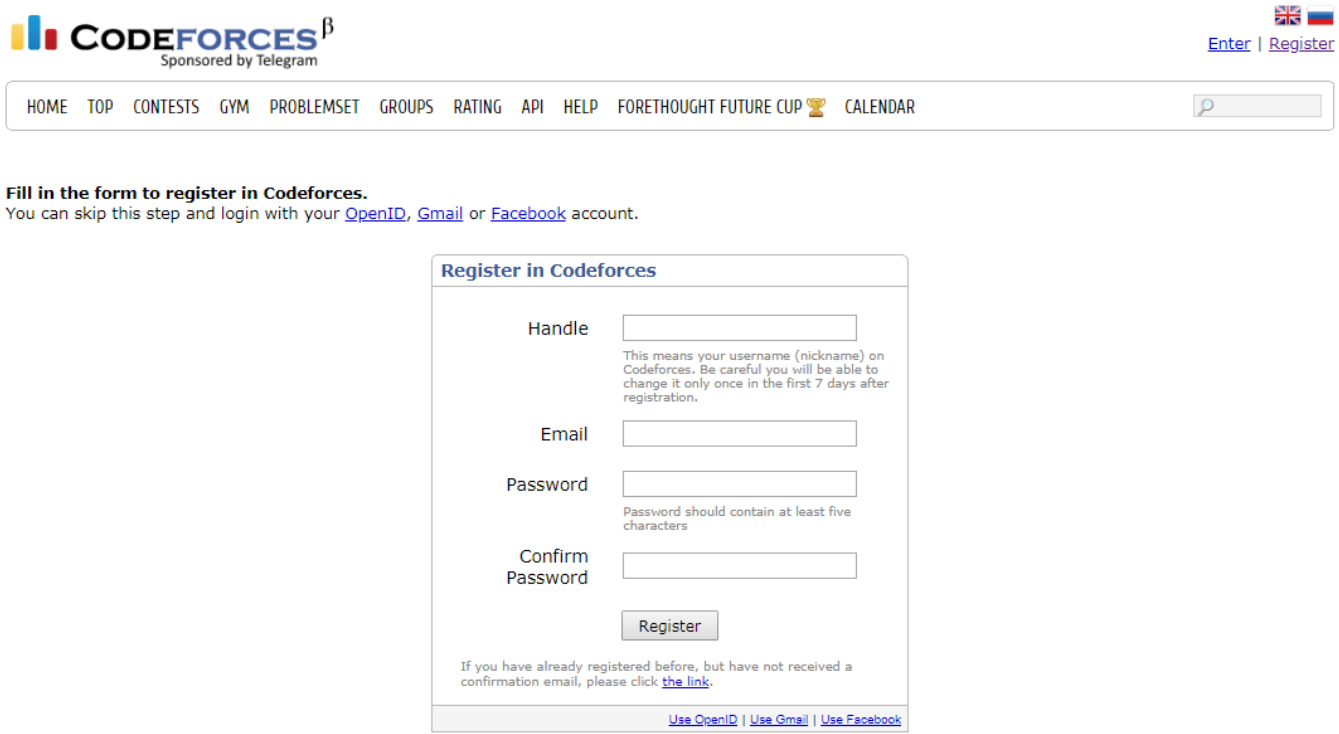
# Codeforces Registration

## Select Register from this Link: codeforces.com



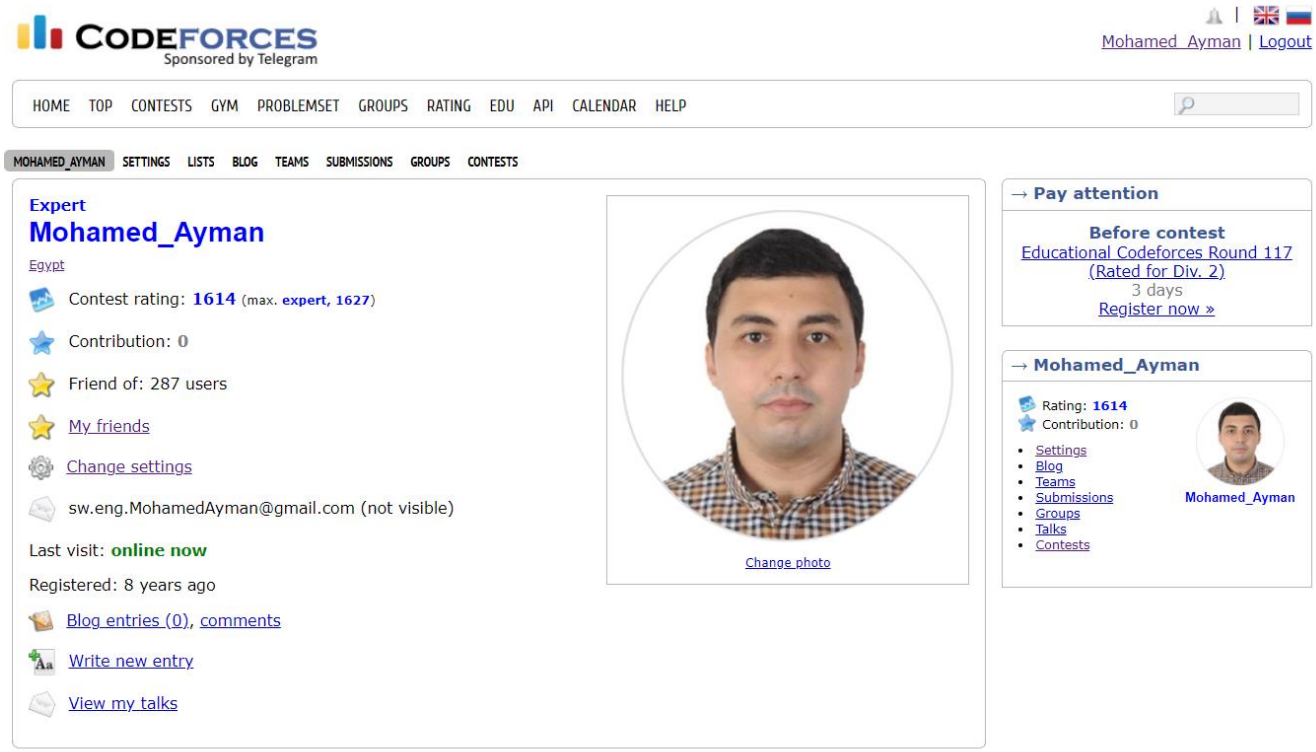
# Registration Form

## Fill your data and you will receive a verification mail



# Your Profile

After verification your account from your mail, your profile will be appeared from you



# Lecture Agenda

- ✔ Section 1: Codeforces Online Judge
- ✔ Section 2: How to Create an Account
- **Section 3: How to Solve a Problem**
- Section 4: How to Learn from Other Solutions
- Section 5: How to Compete in Contest
- Section 6: How to Learn from Contest Tutorial

# How to Solve a Problem

1- Read the Problem Statement

2- Think for a Problem Solution

3- Implement an Efficient & Correct Algorithm

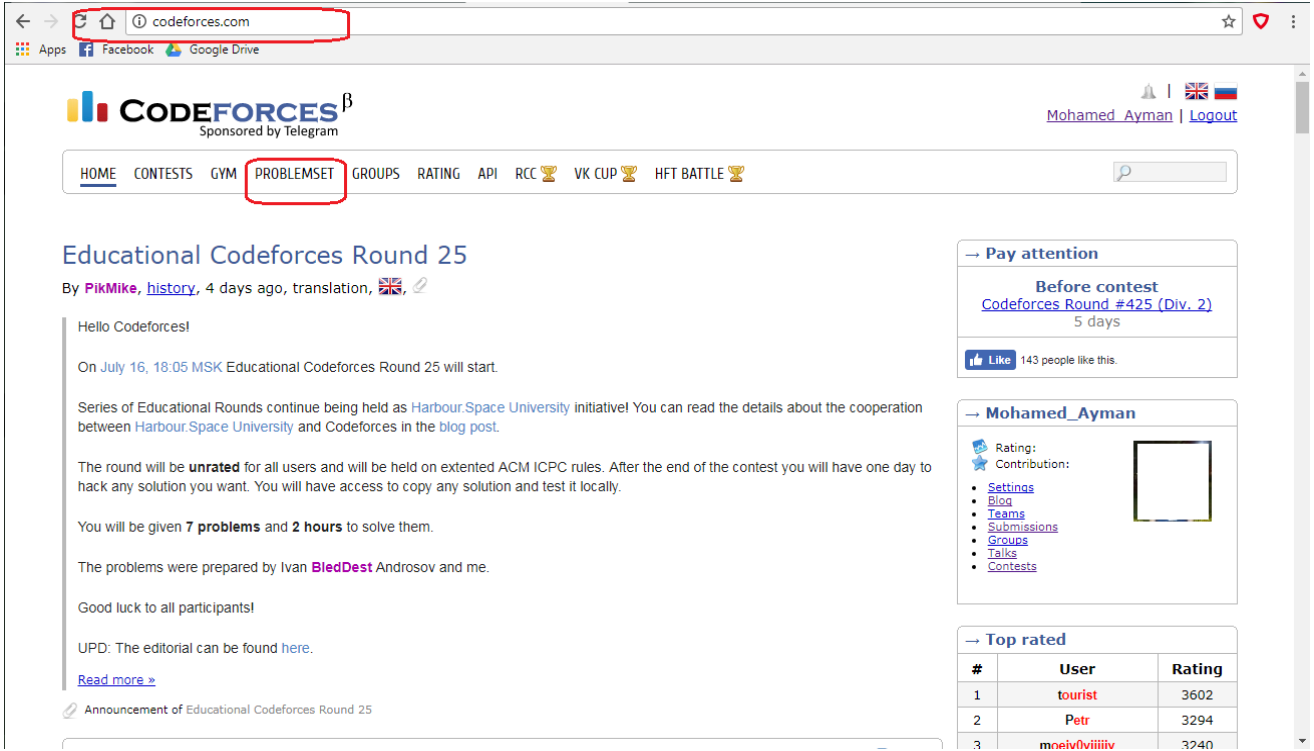
4- Test Your Solution

5- Submit Your Solution

6- Go to Step 1 Till You Get Accepted

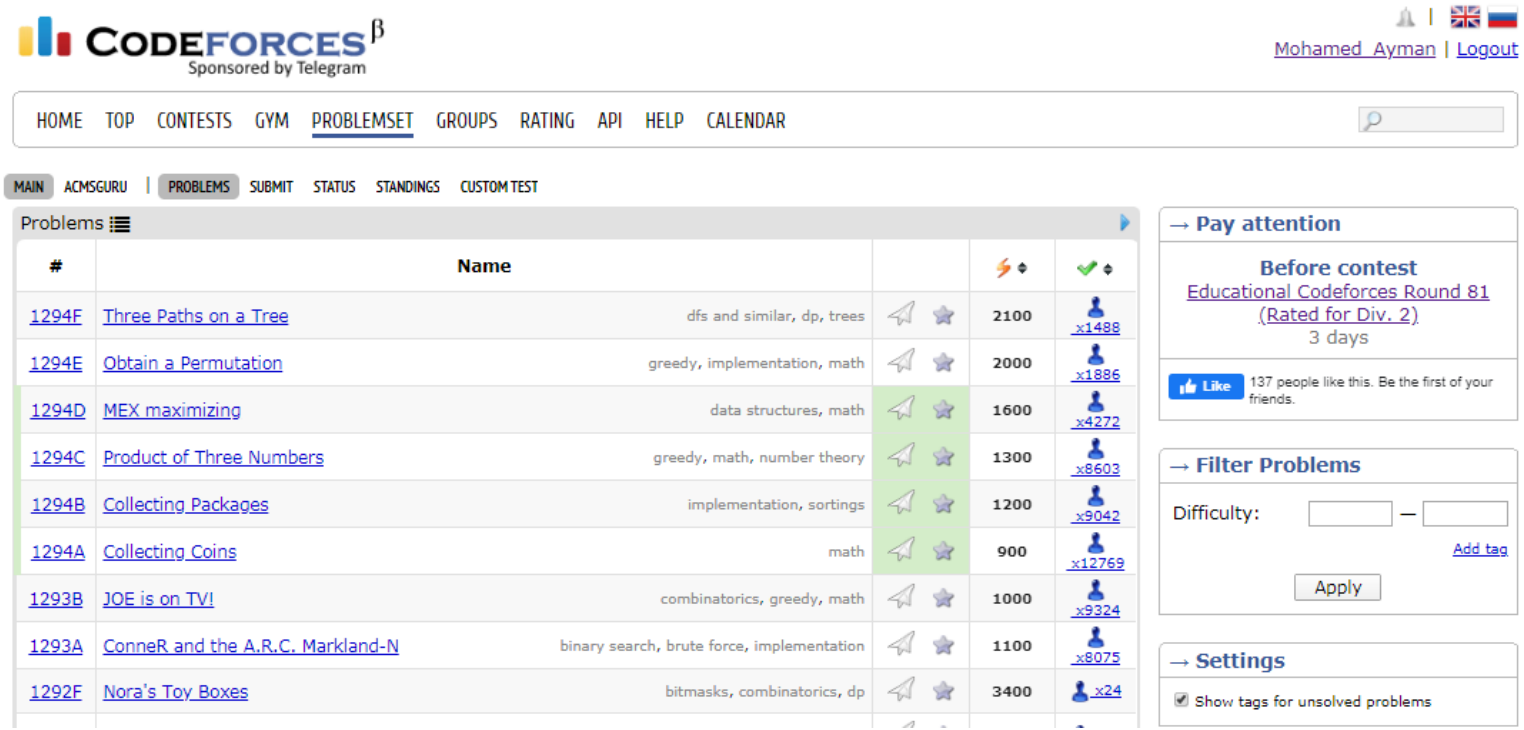
# Codeforces Wall

## Select Problemset Tab to get all problems in codeforces



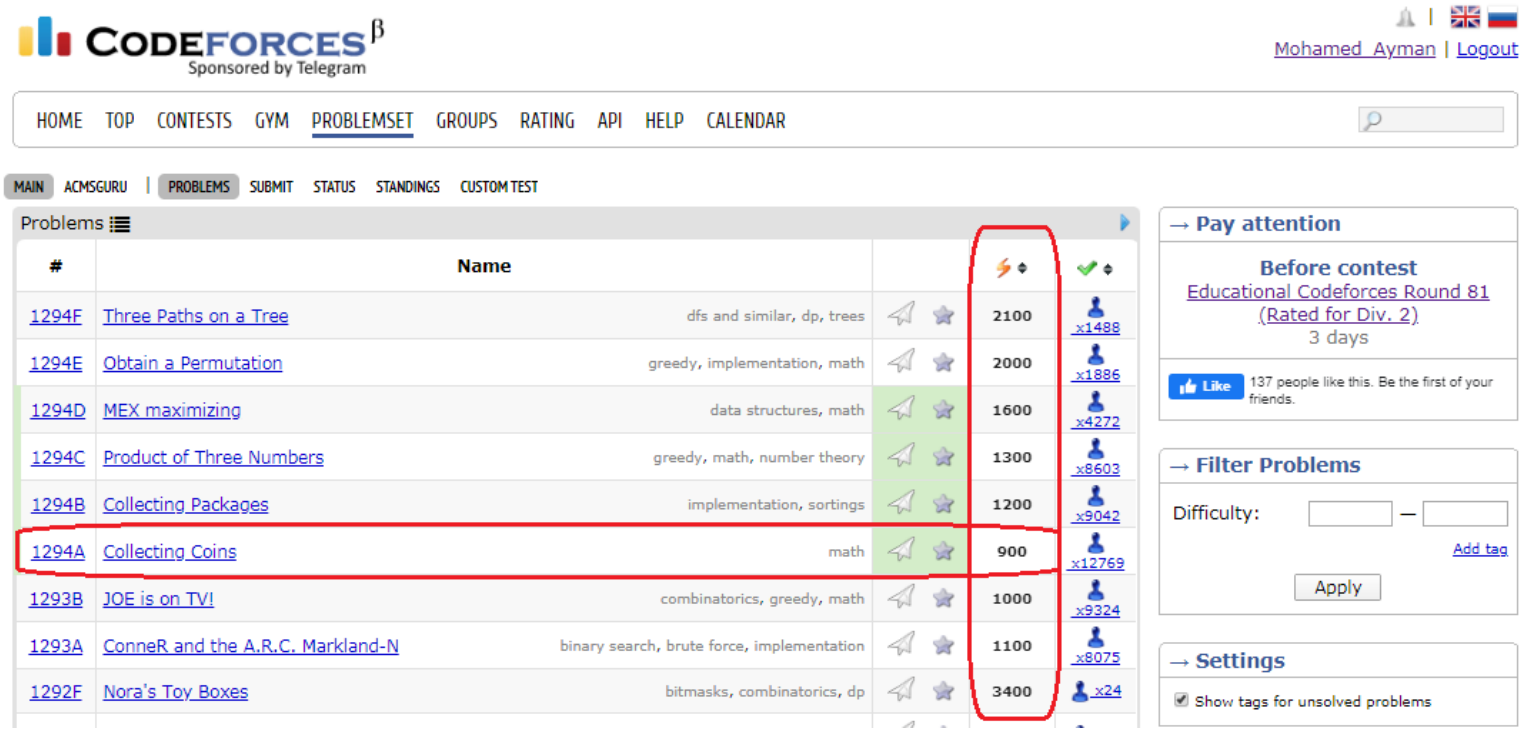
# Problem Set Tab

Any problem has an ID, name, difficulty degree and number of users who solved it.



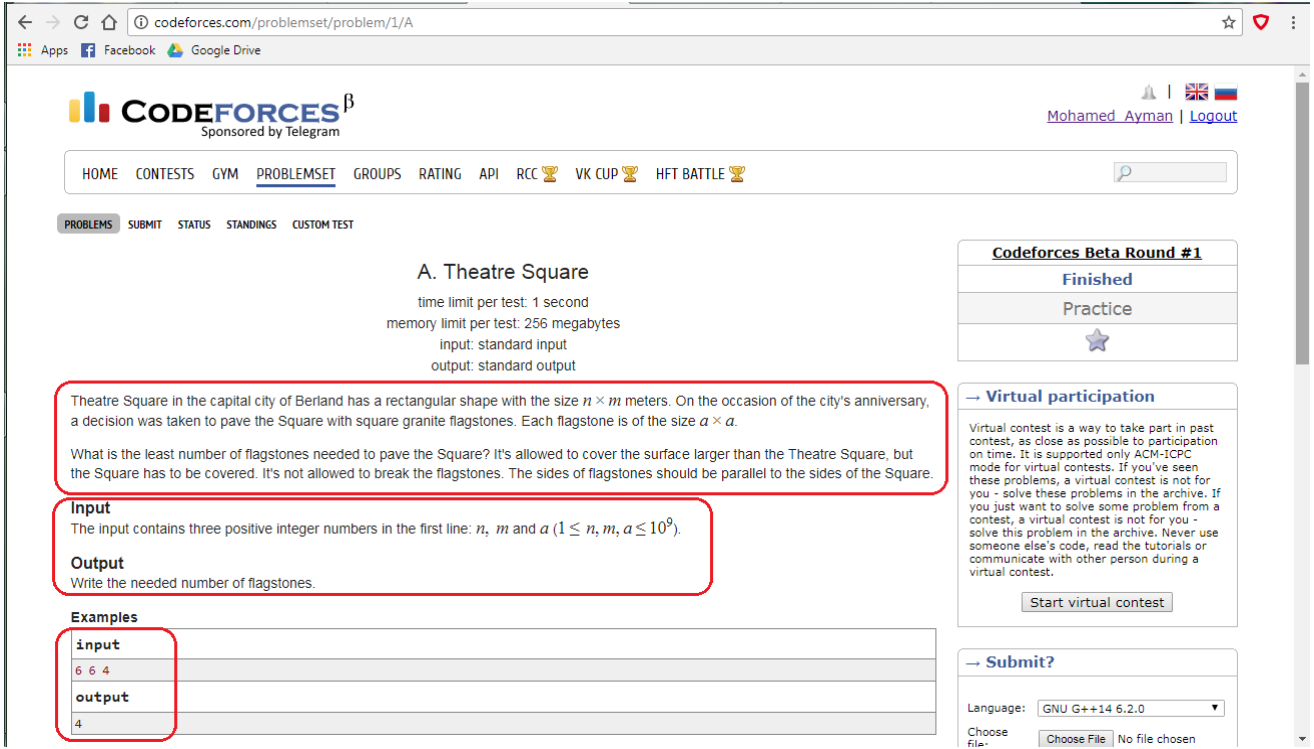
# Problem Set Tab

When you select [difficulty degree] the problems will be sorted according to it's difficulty

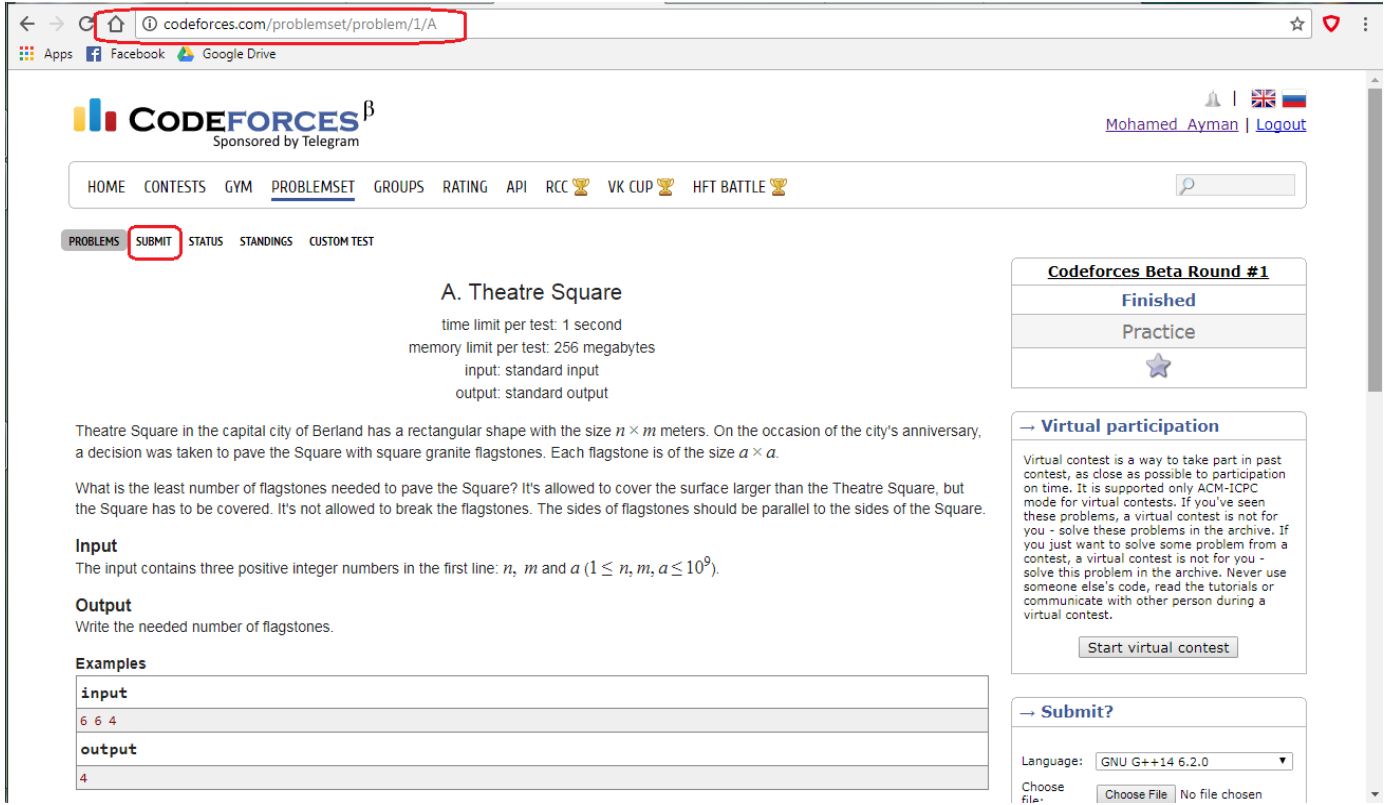


# Problem Body

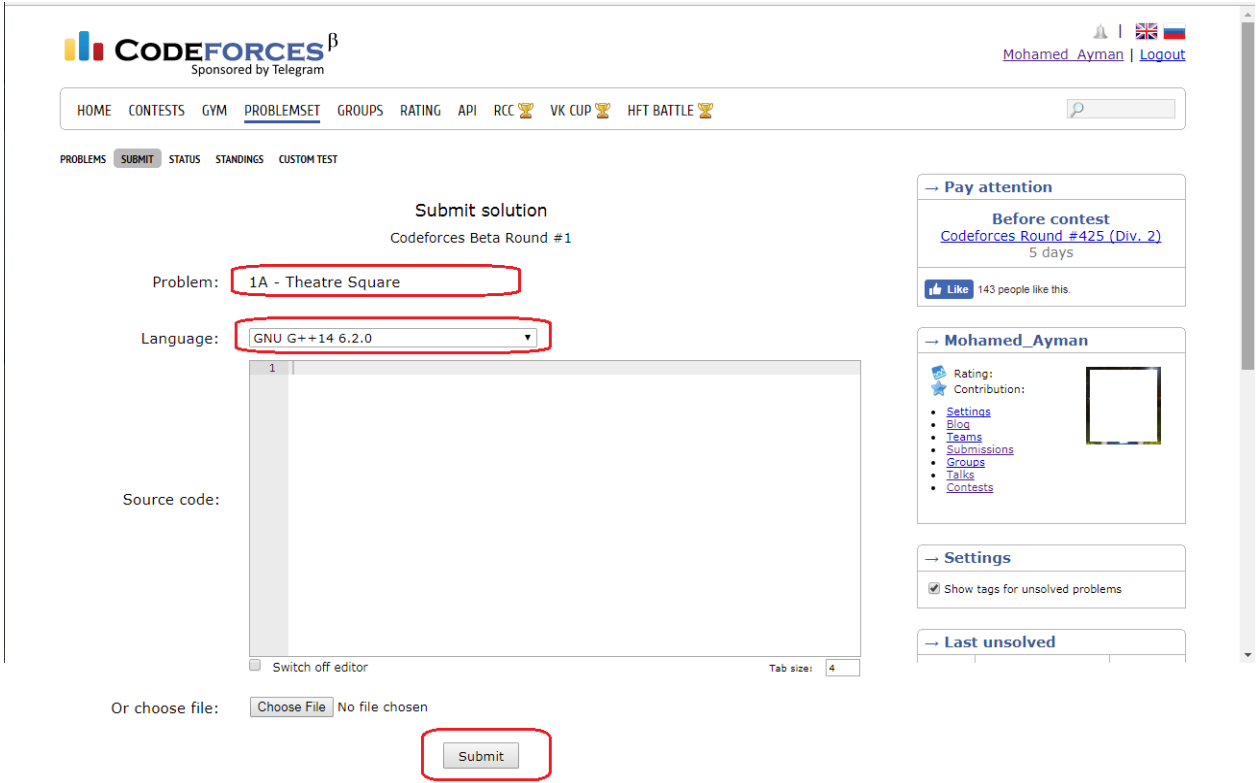
Any problem has a body description and input-output constraint and test case(s)



# Submitting Problem

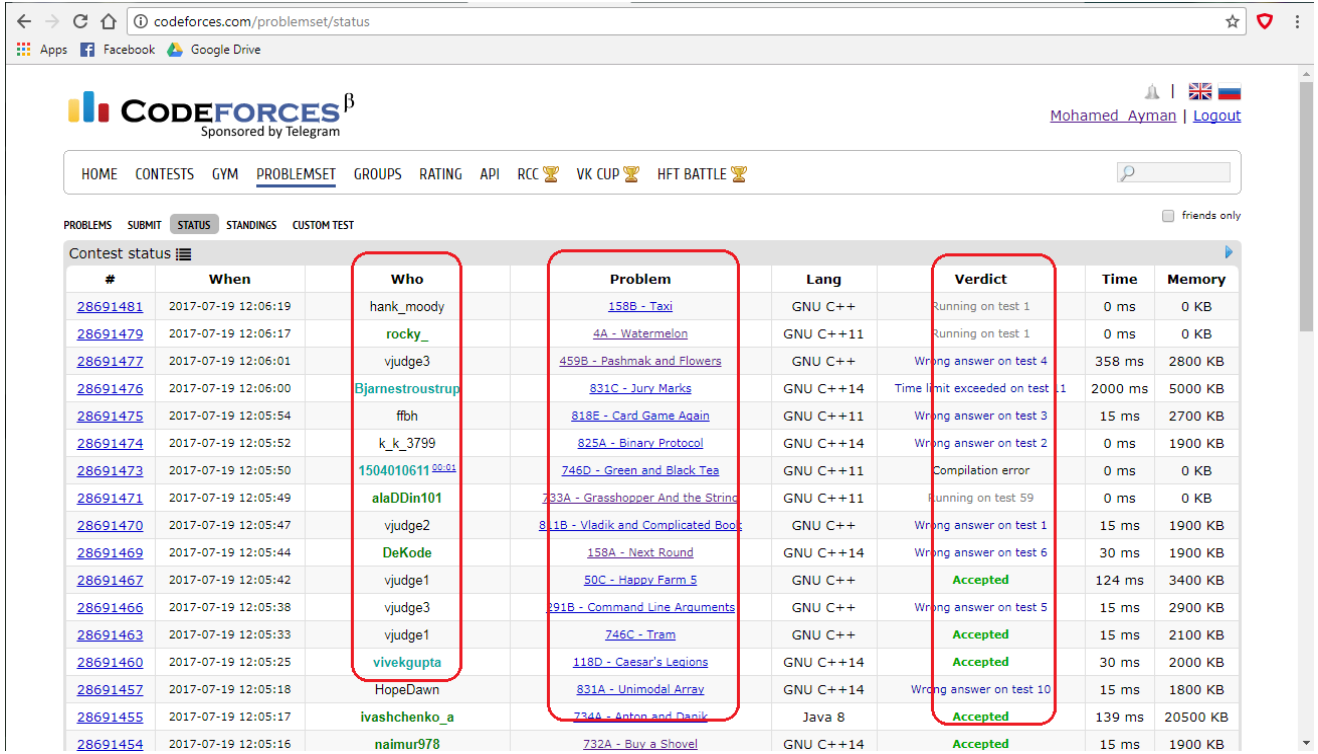


# Submitting Problem



# Problem Verdict

## Your submitted algorithm will be accepted or fail in specific test case



| # | When | Who | Problem | Lang | Verdict | Time | Memory |
|---|---|---|---|---|---|---|---|
| 28691481 | 2017-07-19 12:06:19 | hank_moody | 158B - Taxi | GNU C++ | Running on test 1 | 0 ms | 0 KB |

Codeforces Beta Round #4 (Div. 2 Only)

Finished

Practice

→ Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ACM-ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.

Start virtual contest

→ Practice

You are registered for practice. You can solve problems unofficially. Results can be found in the contest status and in the bottom of standings.

# Filtration of The Round Status

## Codeforces Round #615 (Div. 3) Editorial

By vovuh, history, 2 days ago,

Thanks to Rox and _overrated_ for help with problem ideas and preparation!

1294A - Collecting Coins

Idea: **MikeMirzayanov**

Tutorial

### 1294A - Collecting Coins

Suppose $a \le b \le c$. If it isn't true then let's rearrange our variables. Then we need at least $2c - b - a$ coins to make $a$, $b$ and $c$ equal. So if $n < 2c - b - a$ then the answer is "NO". Otherwise, the answer if "YES" if the number $n - (2c - b - a)$ is divisible by $3$. This is true because after making $a, b$ and $c$ equal we need to distribute all remaining candies between three sisters.

Solution

1294B - Collecting Packages

Idea: **MikeMirzayanov**

Tutorial

### 1294B - Collecting Packages

It is obvious that if there is a pair of points $(x_i, y_i)$ and $(x_j, y_j)$ such that $x_i < x_j$ and $y_i > y_j$ then the answer is "NO". It means that if the answer is "YES" then there is some ordering of points such that $x_{i_1} \le x_{i_2} \le \cdots \le x_{i_n}$ and $y_{i_1} \le y_{i_2} \le \cdots \le y_{i_n}$ because we can only move right or up. But what is this ordering? it is just sorted order of points (firstly by $x_i$ then by $y_i$).

So we can sort all points, check if this ordering is valid and traverse among all these points. For each $k$ from $2$ to $n$ firstly do $x_{i_k} - x_{i_{k-1}}$ moves to the right then do $y_{i_k} - y_{i_{k-1}}$ moves to the up (because this order minimizing the answer lexicographically).

Time complexity: $O(n \log n)$ or $O(n^2)$.
