# Codeforces Online Judge Guide

# Lecture Agenda

We will discuss in this lecture  
the following topics

- 1- Codeforces Online Judge
- 2- How to Create an Account?
- 3- How to Solve a Problem?
- 4- How to Learn from Other Solutions?
- 5- How to Compete in Contest?
- 6- How to Learn from Contest Tutorial?

---

Let's  
**STARTUP**

# Lecture Agenda

---

## Section 1: Codeforces Online Judge

## Section 2: How to Create an Account?

## Section 3: How to Solve a Problem?

## Section 4: How to Learn from Other Solutions?

## Section 5: How to Compete in Contest?

## Section 6: How to Learn from Contest Tutorial?

# Codeforces Online Judge

Codeforces is a website that hosts competitive programming contests.

It is maintained by a group of competitive programmers from ITMO University led by Mikhail Mirzayanov.

## Forethought Future Cup — Final Round

By [Lewin](#), 3 days ago,  

Hello again Codeforces!

The Forethought Future Cup Final round will start on [May 4th, 10:05am PDT](#). **This round will be rated for everyone.** There will be three separate rounds, one for onsite contestants, one for div1, and one for div2. Onsite and div1 will have the same problems. Each round will have 6 problems and be 2 hours long.

Here is a table of the onsite contestants.

<a href="#">scott_wu</a>	<a href="#">neal</a>	<a href="#">ACRush</a>	<a href="#">Fdg</a>	<a href="#">Ra16bit</a>

1- Understand the Problem

2- Implement an Efficient & Correct Algorithm

3- Test Your Solution

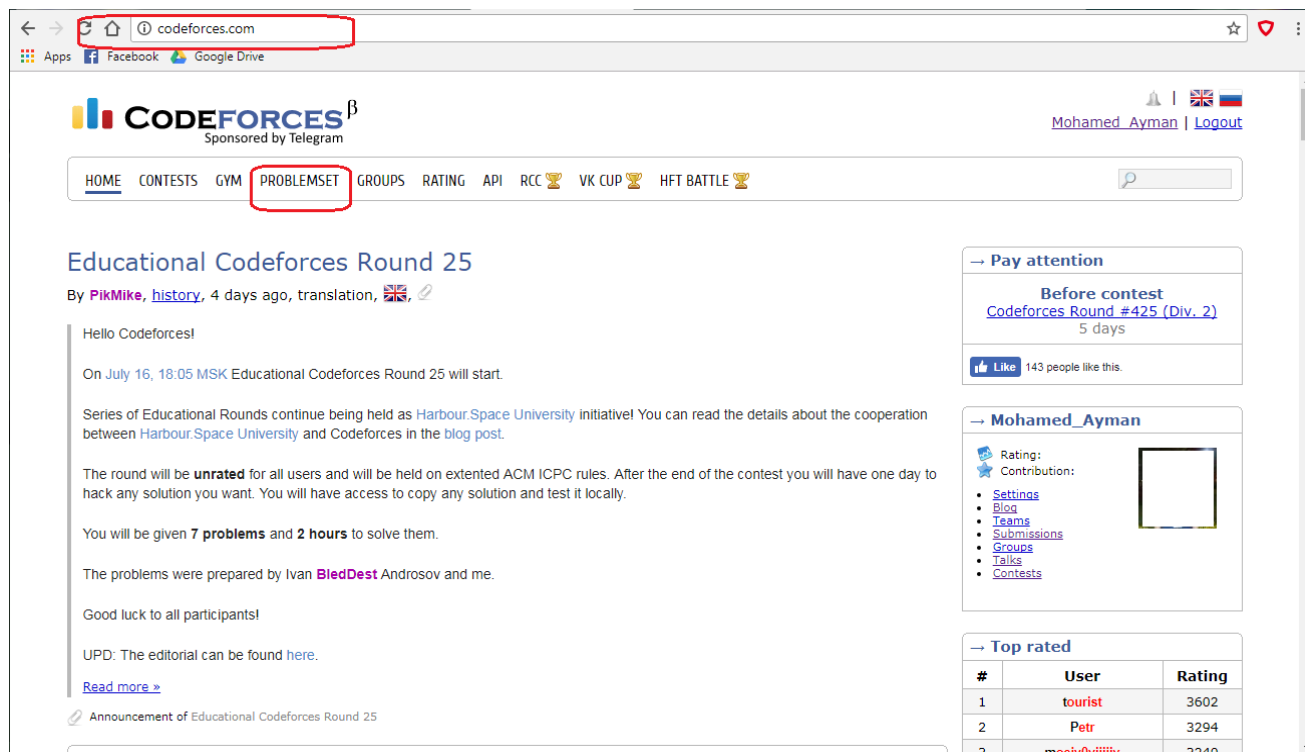

4- Submit Your Solution

5- Go to Step 1 Till You Get Accepted

# Codeforces Wall

Select **Problemset** Tab to get all problems in codeforces

The screenshot shows the Codeforces website interface. The browser's address bar displays 'codeforces.com'. The website header includes the Codeforces logo, a Telegram sponsorship notice, and a user profile for 'Mohamed\_Ayman' with a 'Logout' link. The navigation bar contains several tabs: 'HOME', 'CONTESTS', 'GYM', 'PROBLEMSET' (which is highlighted with a red box), 'GROUPS', 'RATING', 'API', 'RCC', 'VK CUP', and 'HFT BATTLE'. Below the navigation bar, the main content area features an announcement for 'Educational Codeforces Round 25' by 'PikMike', dated 4 days ago. The announcement text includes details about the round's timing (July 16, 18:05 MSK), its 'unrated' status, and the number of problems and time allotted. A sidebar on the right contains a 'Pay attention' section for 'Before contest Codeforces Round #425 (Div. 2)' and a user profile for 'Mohamed\_Ayman' with a rating and contribution section. At the bottom right, a 'Top rated' table lists the top three users.

# Problem Body

Any problem has a body description and input-output constraint and test case(s)

The screenshot shows a web browser at `codeforces.com/problemset/problem/1/A`. The page header includes the Codeforces logo, navigation links (HOME, CONTESTS, GYM, PROBLEMSET, GROUPS, RATING, API, RCC, VK CUP, HFT BATTLE), and user information (Mohamed\_Ayman | Logout). The problem title is "A. Theatre Square" with constraints: time limit 1 second, memory limit 256 megabytes, standard input/output. The problem description states: "Theatre Square in the capital city of Berland has a rectangular shape with the size  $n \times m$  meters. On the occasion of the city's anniversary, a decision was taken to pave the Square with square granite flagstones. Each flagstone is of the size  $a \times a$ . What is the least number of flagstones needed to pave the Square? It's allowed to cover the surface larger than the Theatre Square, but the Square has to be covered. It's not allowed to break the flagstones. The sides of flagstones should be parallel to the sides of the Square." The input/output format is specified: "The input contains three positive integer numbers in the first line:  $n$ ,  $m$  and  $a$  ( $1 \leq n, m, a \leq 10^9$ ). Write the needed number of flagstones." Examples are provided: input "6 6 4" results in output "4". On the right, there are buttons for "Finished", "Practice", "Virtual participation" (with a description of virtual contests and a "Start virtual contest" button), and "Submit?" (with a language dropdown set to "GNU G++14 6.2.0" and a "Choose File" button).

PROBLEMS SUBMIT STATUS STANDINGS CUSTOM TEST

## A. Watermelon

time limit per test: 1 second  
memory limit per test: 64 megabytes  
input: standard input  
output: standard output

One hot summer day Pete and his friend Billy decided to buy a watermelon. They chose the biggest and the ripest one, in their opinion. After that the watermelon was weighed, and the scales showed  $w$  kilos. They rushed home, dying of thirst, and decided to divide the berry, however they faced a hard problem.

Pete and Billy are great fans of even numbers, that's why they want to divide the watermelon in such a way that each of the two parts weighs even number of kilos, at the same time it is not obligatory that the parts are equal. The boys are extremely tired and want to start their meal as soon as possible, that's why you should help them and find out, if they can divide the watermelon in the way they want. For sure, each of them should get a part of positive weight.

### Input

The first (and the only) input line contains integer number  $w$  ( $1 \leq w \leq 100$ ) — the weight of the watermelon bought by the boys.

### Output

Print `YES`, if the boys can divide the watermelon into two parts, each of them weighing even number of kilos; and `NO` in the opposite case.

### Examples

input	Copy
8	
output	Copy
YES	

### Note

For example, the boys can divide the watermelon into two parts of 2 and 6 kilos respectively (another variant — two parts of 4 and 4 kilos).

Codeforces Beta Round #4 (Div. 2 Only)

Finished

### → Attention

Package for this problem was not updated by the problem writer or Codeforces administration after we've upgraded the judging servers. To adjust the time limit constraint, solution execution time will be multiplied by 2. For example, if your solution works for 400 ms on judging servers, then value 800 ms will be displayed and used to determine the verdict.

### → Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ACM-ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or

Registration for the contest

## Codeforces Round #455 (Div. 2)

Terms of  
agreement:

The registration confirms that you:

- \* have read the contest rules by the links <http://codeforces.com/blog/entry/456> and <http://codeforces.com/blog/entry/4088>
- \* will not violate the rules described on <http://codeforces.com/blog/entry/456> and/or <http://codeforces.com/blog/entry/4088>
- \* will not communicate with other participants, share ideas of solutions and hacks
- \* will not use third-party code, except stated in <http://codeforces.com/blog/entry/8790>
- \* will not attempt to deliberately destabilize the testing process and try to hack the contest system in any form
- \* will not use multiple accounts and will take part in the contest using your personal and the single account.

Take part: ☒ as individual participant

# How to Learn from Contest Tutorial?

- In Tutorial Section for each contest in codeforces there is a blog which explain the idea of the problems in this round with a solution example.

## Codeforces Round #615 (Div. 3) Editorial

By [vovuh](#), [history](#), 2 days ago,  

Thanks to [Rox](#) and [\\_overrated\\_](#) for help with problem ideas and preparation!

[1294A - Collecting Coins](#)

Idea: [MikeMirzayanov](#)

[Tutorial](#)

### 1294A - Collecting Coins

Suppose  $a \leq b \leq c$ . If it isn't true then let's rearrange our variables. Then we need at least  $2c - b - a$  coins to make  $a$ ,  $b$  and  $c$  equal. So if  $n < 2c - b - a$  then the answer is "NO". Otherwise, the answer is "YES" if the number  $n - (2c - b - a)$  is divisible by 3. This is true because after making  $a$ ,  $b$  and  $c$  equal we need to distribute all remaining candies between three sisters.

[Solution](#)

[1294B - Collecting Packages](#)

Idea: [MikeMirzayanov](#)

[Tutorial](#)

### 1294B - Collecting Packages

It is obvious that if there is a pair of points  $(x_i, y_i)$  and  $(x_j, y_j)$  such that  $x_i < x_j$  and  $y_i > y_j$  then the answer is "NO". It means that if the answer is "YES" then there is some ordering of points such that  $x_{i_1} \leq x_{i_2} \leq \dots \leq x_{i_n}$  and  $y_{i_1} \leq y_{i_2} \leq \dots \leq y_{i_n}$  because we can only move right or up. But what is this ordering? it is just sorted order of points (firstly by  $x_i$  then by  $y_i$ ).

So we can sort all points, check if this ordering is valid and traverse among all these points. For each  $k$  from 2 to  $n$  firstly do  $x_{i_k} - x_{i_{k-1}}$  moves to the right then do  $y_{i_k} - y_{i_{k-1}}$  moves to the up (because this order minimizing the answer lexicographically).

Time complexity:  $O(n \log n)$  or  $O(n^2)$ .
